***"Love for the unspoken words of nature"***

My work is in the form of abstract landscapes and snapshots of details of nature. Nature's unseen vibrations and energy. I don't necessarily always ponder what is happening above ground but below, seismic happenings! Reflecting on space, time, relationships, interactions between people and energy.

My intention, to spark personal recollections in the viewer from a unconventional perspective, carefully building layers (obsession with layers!) of depth using colour, luminescence, sculptural textures and surface transitions, transitions of slight similarities. This work will change every time you study it.
