PROFILE Rachel Rae creates personal paintings of past and present experiences, creating memory and connection to the vibrant colour and uniqueness of the world around us. Being an avid traveller and walker, Rachel witnesses many life moments which is the inspiration for her artwork, painting personal records of flora, fauna, people and landscapes. Painting in acrylics, Rachel quickly highlights the movement of nature contrasting with the static man-made objects and how humans, animals and nature co-exist. But by spending the time to paint the smaller details and minutiae, it allows time for reflection during the process. Capturing the flora, fauna, people and landscapes in life's moments creates a memory and connection to past and present experiences.
